welcome to essens

LET ME INTRODUCE TO YOU OUR NEW CATALOGUE, WHICH WE HAVE PREPARED IN THE TRUE, ESSENS SPIRIT. AS THE FIRST CONTACT WITH US, EACH OF OUR CUSTOMERS CAN ENJOY THE STYLE AND DESIGN, YET ALSO THE ACCESSIBILITY OF EVERYTHING WE HAVE CREATED FOR YOU. EACH PREMIUM QUALITY PRODUCT IS READY TO HELP YOU GAIN REGULAR CUSTOMERS AND WILL NEVER DISAPPOINT YOU. THE FOLLOWING PAGES, AS WELL AS THE ESSENS FAMILY MEMBERS, ARE READY TO ASSIST YOU IN THE SELECTION OF THIS PRODUCT. AND SO, I BELIEVE, YOU WILL FALL IN LOVE WITH US. ENJOY THE ESSENS WORLD AND ALL THAT IT OFFERS YOU.

MICHAL KOVÁŘ

perfume

DIVE WITH US INTO THE WORLD OF FRAGRANCES, BREATHE SLOWLY AND SENSE THE UNIQUE NUANCES OF DISTINCTIVE PERFUMES. LEARN TO UNDERSTAND YOUR SENSES AND BE INSPIRED BY THE INFINITE RANGE OF FRAGRANT COMPONENTS THAT WE USE TO MAKE CHARMING PERFUMES OF TOP-CLASS QUALITY FOR YOU.

20 % fragrant essence = elite among perfumes

ESSENS perfumes are created primarily with emphasis on the highest possible quality. Our production is certified by GMP (Good Manufacturing Practice), ISO 9001-2008 and fulfils the strictest rules and standards of the EU. We guarantee the content of 20 % aroma essence (essential oils), exclusively supplied by one of the top world producers for the private brand of the SELUZ companies, which ensures rank amongst the elite of perfumes.

Let's imagine the most simple explanation of the production process

Essences of the highest quality and exclusively of natural sources are first mixed with pure perfume alcohol. To denaturate this alcohol, only distilled water is used so that the fragrance and the quality of the final product is not at all influenced. The resulting mixture is supercooled to a temperature of -7°C and perfectly filtered, the filtration uses a filter of 10 microns. For the components to be able to bind into a harmonic unit, the perfume matures for at least 8 weeks in stainless steel storage tanks. It is then filled into flacons that are cleaned by air and created by Italian masters in a well known workshop. Finally, it is packed into a box designed with the emphasis of purity. All production steps are under constant control of quality and only faultless materials are used for the production. All of our products are certified and registered for sale in every country, where an ESSENS branch is established.

Very intense fragrance that is felt immediately after application; this sensation lasts a few seconds, but in some perfumes this may even last up to 15 minutes.

Fragrance that can be felt immediately after the unwinding of the top note, the intensity lasts roughly 2-3 hours.

In this phase, the fragrances are released slowly; the duration is extended for a few hours, sometimes even tens of hours.

Our fragrance, our representation...

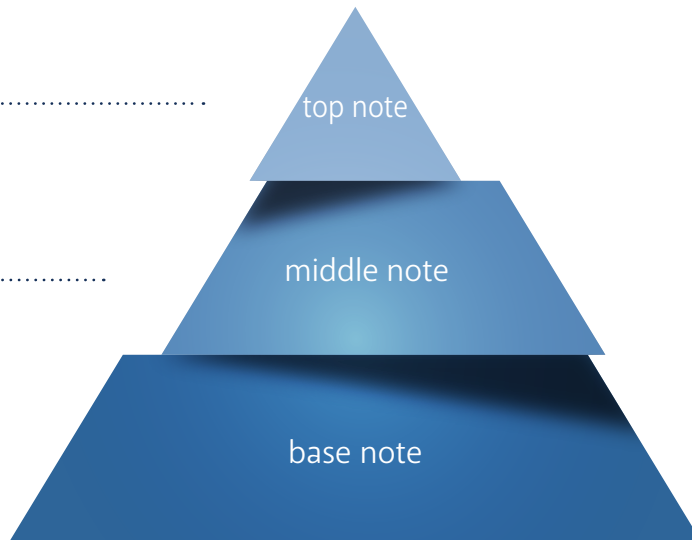

One of the five basic human senses is smell. All that we smell is immediately transmitted to our brain where the olfactory organs are situated. Let's not forget the fact that pleasant and well-chosen fragrances are our first impression of our surroundings.

The emotion that the perfume evokes plays the most important role for choosing your essence. The type of skin, what we wear and even how we feel at that moment subsequently forms the final choice and fragrance that passers-by and people perceive. That is the reason why the same perfume has a different smell for all of us.

Let's pay attention to choosing the right perfume. All fragrances that we wish to introduce are available in the form of small samples. Fragrant ingredients are gradually released for several hours and you have the unique opportunity to try the perfume and choose the best scents, crafted especially, for you. Think about the fact that every situation is an opportunity for another type of fragrance with different intensity. To school or to work we choose distinctively lighter fragrances that do not irritates our surroundings, only those which complete our personalities. On the contrary, evening company will appreciate a distinctive perfume that will underline your charisma.

The magic of lasting fragrance

- perfume works best where the skin is mostly perfused with blood. It is, therefore, applied behind ears, to the neck, wrist and elbow, but also to the ankles
- the fragrance will last for a lengthened amount of time in your freshly washed hair
- clothes should be put on after the skin has absorbed the perfume
- to make the fragrance last longer it is suitable to enhance it by using complimentary products of the same aroma
- for a lower intensity, it is enough to walk into a fragrance cloud, created by spraying perfume in front of yourself

W 101

ESSENS Body Mist

Fresh and soft fragrance in the form of body spray is optimal for hot summer days but the pleasant feeling can be provided all year long. Young ladies can appreciate this especially as they may find the classic perfumes too heavy.

The 3 % content of aroma essence categorises ESSENS Body Mist among the level of Eau de Cologne, where the aroma content is between 3 - 5 %.

ESSENS Body Mist comes into existence by using the same manufacture procedure as ESSENS Perfumes so that the perfect connection of essential oils with other components is achieved.

- a complex of moisturising substances indulge your skin, smoothing, softening and protecting against dryness
- top cleaning substances ensure excellent capability of removing dirt from the skin surface
- special recipe reduces the presence of undesirable body odours

ESSENS Unique

Original and unique perfumes developed for original and unique personalities!

The hallmark of luxury, quality and timelessness. Those are ESSENS Unique perfumes.

They are the resulting desire of a world-renowned perfumer to create a unique perfume composition using the finest and most expensive natural materials.

A long process of ageing in stainless steel storage tanks guarantees perfect connection of the individual components, which is then followed by filling perfume into our designer glass flacons with our special, almost invisible, part-atomizer. This enables highly efficient dispersion of perfume particles into a very fine fragrant cloud. Closure is provided from the exotic, luxury, wooden lid.

32,40 €

Sweet-floral fragrance for confident, always trendy women.

At first the luminous and sparkling drops of neroli are revealed along with juicy tones of lemon with a hint of raspberry. A delicate floral scent of gardenia, orange blossom and jasmine are extended in the middle note of the perfume by dry tones of hay. They are accompanied by scents of patchouli, amber, soft and warm vanilla and sensual musk.

EU 01

Top note: lemon, neroli, raspberry

Middle note: gardenia, hay, orange flower, jasmine

Base note: patchouli, amber, vanilla, musk

A delicate floral-fruity fragrance born for women with a tender romantic soul.

Main tones with touches of blackcurrant, apple, pineapple and green grass are full of élan. The leaves of violets lend unsurpassed elegance to the top note of the perfume, then the cool and clean feeling in the middle note of the perfume comes from sea water with a hint of Calone followed by combined sweet jasmine, a rich rosy nuance and underlined by lily-of-the-valley. Ambra, sandalwood and musk then finally fade into a warm and sensual base.

EU 02

Top note: blackcurrant, green grass, pineapple, violet leaves, apple

Middle note: sea water, Calone, lily-of-the-valley,, rose, jasmine

Base note: sandalwood, amber, musk

Absolutely unique among men's fragrances, full of dazzling woody notes for real lovers of luxury.

The first phase appeals with delightful tones of cologne, followed by the intense middle note of the perfume, which consists of pure sweet jasmine. Elegance in the base note of the perfume is highlighted with mysterious sandalwood, patchouli and finally gently accentuated with tender amber.

EU 03

Top note: cologne

Middle note: jasmine

Base note: wood, sandalwood, patchouli, amber, oud

Mystery and orient are combined in this timeless men's scent. A unique combination of woody aromas leave a sensual and irresistible trace.

The composition opens with citrus tones and tones of bergamot combined with green galbani and red pepper. The middle note is comprised of fine rose blossoms, surrounded by chords of sage, lavender and cumin. The intense strength of the composition comes from base note of leather, sandalwood, tonka bean, amber wood and incense.

EU 04

Top note: red pepper, lemon, bergamot, green galbanum

Middle note: spices, clary sage, lavender, rose, cumin

Base note: leather, sandalwood, tonka bean, amber wood, incense

colostrum

GET TO KNOW THE MOST PRECIOUS GIFT OF NATURE. IT IS LOVE, FONDNESS AND THE TREMENDOUSLY STRONG INSTINCT TO PROTECT THE MOST AMAZING THING THAT EVERY MOTHER BRINGS INTO THIS WORLD - A NEW LIFE. FOR COMPLETELY DEFENSELESS OFFSPRING ONLY THE FIRST BREAST MILK IS THE SOURCE OF THE STRONGEST ANTIBODIES, WHICH HELP THEM TO SURVIVE IN THEIR NEW ENVIRONMENT. TREAT YOURSELF WITH COLOSTRUM, THE CLEANEST, COMPLETELY NATURAL MIRACLE THAT HAS TRANSFERRED STRENGTH TO THE YOUNG OF ALL MAMMALS FOR THOUSANDS OF YEARS.

What is colostrum?

- Colostrum is the first milk, produced by the mammary glands after giving birth, that contains all necessary ready-made antibodies to protect against infection in the early weeks of life.
- ESSENS Colostrum comes exclusively from bovine (cow) farms with permanent veterinary control in the Moravian-Silesian Region. Further processing takes place in a pharmaceutical company that is certified with GMP under the auspices of WHO - (World Health Organization) and HACCP - (system of risk analysis and determination of critical control points) and under the auspices of the Ministry of Agriculture of the Czech Republic according to EU directives.
- ESSENS Colostrum is obtained exclusively from the first yield of milk after the birth of the calf. Only this first yield guarantees the highest possible number of beneficial substances.
- Colostrum is valuable for its high content of vitamins (A, D, E, C, B1, B2, B6, B12, folic acid, pantothenic acid, biotin, niacin), minerals, trace elements (sodium, potassium, calcium, phosphorus, magnesium, iron, iodine, chromium), proteins and protease inhibitors
- Colostrum contains antibodies which are effective against bacteria, viruses and fungi. It also contains Lactoferrin - a multifunctional protein which reduces inflammation in the body
- Colostrum contains growth factors that positively influence wound healing, creation of muscle mass, they enhance the nervous system and increase the overall vitality of the body.
- Colostrum contains immunoglobulins that have an essential role in protecting the immune system. These are mainly immunoglobulins IgG, IgA and IgM. The largest portion being immunoglobulin IgG, which in ESSENS Colostrum is very high, at least 41%.

ESSENS Colostrum

food supplement developed and manufactured under pharmaceutical supervision

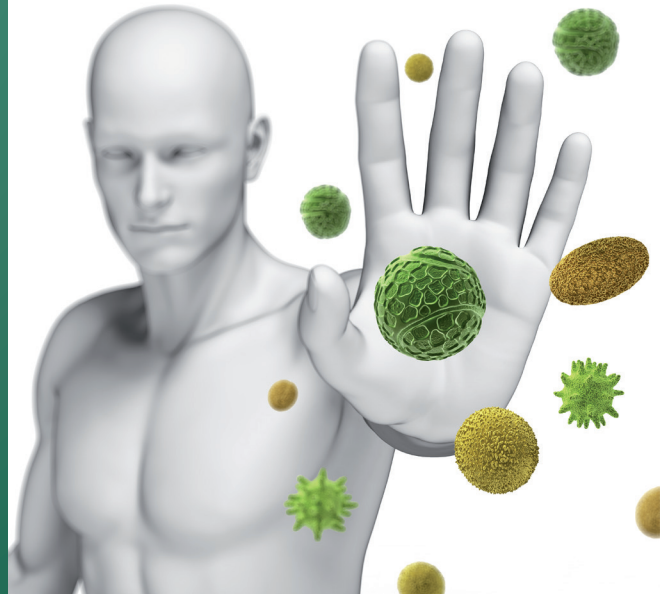

- supports natural immunity
- helps with cold and flu
- contributes to strengthening immunity even during autoimmune diseases
- contributes to accelerating the treatment of inflammatory diseases
- helps increase the absorption capacity of the digestive tract and also takes care of the intestine
- optimal support for the body during intense sports training

- high content of active ingredient IgG40 (400mg)
- without artificial colouring, sugar or gluten
- excellent tolerance for people with lactose intolerance
- there are no known negative effects whilst being taken with other food supplements or medication

To strengthen the immune system, we recommend taking ESSENS Colostrum as a three-month treatment, especially in spring and in autumn.

ESSENS Colostrum + Vitamin D

food supplement developed and manufactured under pharmaceutical supervision

- supports natural immunity
- helps with cold and flu
- contributes to strengthening immunity even during autoimmune diseases
- contributes to accelerating the treatment of inflammatory diseases
- helps increase the absorption capacity of the digestive tract and also takes care of the intestine
- optimal support for the body during intense sports training
- high content of active ingredient IgG40 (400mg)

- without artificial colouring, sugar or gluten
- excellent tolerance for people with lactose intolerance
- there are no known negative effects whilst being taken with other food supplements or medication

ESSENS Colostrum in combination with vitamin D:

- counteracts osteoporosis and the decalcification of the body
- helps to enhance strength of bones and teeth
- helps to reduce high blood pressure

Vitamin D deficiency has been associated with a wide range of diseases such as respiratory infection, osteoporosis, tooth decay, high blood pressure, high blood cholesterol, reduced production of insulin, depression, autoimmune diseases, and many others.

ESSENS Colostrum + Curcumine

food supplement developed and manufactured under pharmaceutical supervision

- supports natural immunity
- helps with cold and flu
- contributes to strengthening immunity even during autoimmune diseases
- contributes to accelerating the treatment of inflammatory diseases
- helps increase the absorption capacity of the digestive tract and also takes care of the intestine
- optimal support for the body during intense sports training
- high content of active ingredient IgG40 (100mg)

- without artificial colouring, sugar or gluten
- excellent tolerance for people with lactose intolerance
- there are no known negative effects whilst being taken with other food supplements or medication

ESSENS Colostrum combined with curcumin:

- protects against cancer diseases
- is a part of alternative therapy against cancerous diseases when combined with medical treatment
- helps reduce the cancer cells' resistance against the effects of radiation during radiotherapy
- helps to reduce the effects of cancerous growths

Curcumin is an extract from a plant called turmeric (*curcuma longa*) which has powerful antioxidant and anti-inflammatory effects and is therefore very often used as an alternative treatment of cancer diseases. **Piperine** is an extract from the fruit of black pepper which contributes to the blood circulation of the mucous membranes and increases, up to twenty-times higher, the efficiency of curcumin.

ESSENS Colostrum Probiotics

food supplement manufactured under pharmaceutical supervision

- intended for individual preparation of homemade yoghurt
- contains the 4 most valuable strains of probiotics: *Streptococcus lactis*, *Lactobacillus bulgaricus*, *Lactobacillus acidophilus*, *Bifidobacterium bifidum*
- contains a prebiotic, which acts as a source of energy for probiotics
- yoghurt made from ESSENS Colostrum Probiotics is a “functional food”, i.e. foodstuff that is made from naturally occurring ingredients and has beneficial effects on the health of the consumer
- helps to supplement the lactic bacteria into the digestive tract, regulates impaired intestinal microflora due to inappropriate diet, antibiotic treatment and other detriments.

- improves and regulates digestion, prevents the multiplication of harmful substances and protects the mucous membrane of the stomach and intestines
- helps increase the body's resistance against potential infections
- helps reduce cholesterol in the blood
- contributes to natural protection against diarrhoea and yeast infections
- helps the body regulate blood sugar levels, may support calcium absorption and reduces symptoms of lactose intolerance
- colostrum, contained in the ESSENS Colostrum Probiotics probiotic mixture, helps to support the immune system, regulates digestion and has an anti-inflammatory effect
- bioactive yoghurt is produced to the highest possible quality without preservatives, sweeteners and other chemical ingredients
- ESSENS Colostrum Probiotics yoghurt features up to 100 times the number of live bacteria than the commonly sold yoghurt

contains 6 packets of 10 g, 1 packet corresponds to production of yoghurt from 1 litre of fresh milk

price Yogurt Maker
36,40 €

The preparation of ESSENS Colostrum Probiotics yoghurt could not be easier!

To the stainless steel container of ESSENS Yogurt Maker, pour 1 litre of fresh (preferably whole fat) milk, at room temperature, with 1 bag of ESSENS Colostrum Probiotics and mix thoroughly. Put the stainless steel bowl in the ESSENS Yogurt Maker and close it with the transparent lid. After plugging in, the heating element starts to heat to a maximum temperature of 43 °C. At higher temperatures, the yoghurt cultures would die. The process of producing the yoghurt takes approximately 8 hours. For thicker and more acidic yoghurt let the machine work longer, but not more than 12 hours. Once your yoghurt is done, it is ready for consumption. We recommend to stabilize the yoghurt by placing it in the refrigerator where the storage period should not exceed more than 3-5 days.

ESSENS Yogurt Maker

simple apparatus for preparing live ESSENS Colostrum Probiotics yoghurt

- easy operation without complicated settings, controls or supervision
- intelligent, self-regulating, heating PTC element guarantees maximum safety
- energy saving wattage of 20W
- high-quality stainless steel container with separate plastic lid, 1.5 litres
- clean design with a smooth surface for easy maintenance
- transparent plastic lid allows you to watch the preparation of yoghurt
- the warning light indicates the "on" status
- materials used are harmless to health and they are suitable for food contact

ESSENS Colostrum Probiotics can be flavoured with fruit, muesli, honey or jam. It is tasty in salads and it is possible to prepare dressings or healthy ice cream with it. It can also be used as a moisturising facial mask.

ESSENS Colostrum in cosmetics

We can also use the benefits of ESSENS Colostrum in body cosmetics and especially in ESSENS Colostrum+ exclusive skin care products, which were created on the basis of the latest research, knowledge and trends in premium medical cosmetics.

We do not use skin burdening substances, only natural products of the highest possible quality.

What bonuses have cosmetics with colostrum content?

- beneficial effects on the regeneration of skin cells, due to the positive impact of growth factors
- antibacterial and anti-inflammatory effects of lactoferrin and lactoperoxidase prevent inflammatory diseases and skin irritation
- through the effects of phospholipids (fats and organic acids) occur the penetration of active substances in the upper layer of the skin and subsequent formation of lipid film, a thin layer substantially slowing evaporation of water from the skin
- regenerates skin cells and possesses an anti-ageing effect
- assists in the removal and treatment of skin defects and acne
- accelerates the removal of wrinkles
- protects the skin from the action of the day's unfavourable external influences

Benefits of Body Care ESSENS Colostrum

- without parabens
- for all skin types and for everyday use
- optimal for people with sensitive skin
- non-toxic to the environment
- colostrum creates softness and gives a feeling of freshness, it has a positive effect on the vitality of the skin and anti-ageing effect

Treat your body with the best care. Body cosmetics with colostrum not only charm with their scent but also leave the skin velvety soft, perfectly moisturised and with granted, intense nourishment.

ESSENS Colostrum Shower Gel

- hemp oil used to treat skin diseases is hypoallergenic, helps to restore the natural protective microfilm of skin, slows the ageing process of the skin, moisturises, softens and has both significant anti-inflammatory and antibacterial effects
- natural ingredient laurylpolyglucosid, from the extracts of corn and coconut oil, creates a rich, thick and stable foam
- glucose guarantees the highest possible softness of shower gel
- top washing materials developed for this product ensure excellent ability to gently remove dirt from the skin surface
- the special composition eliminates sensitivity to hardness of water and retains excellent washing qualities

ESSENS Colostrum Nourishing Body Cream

- argan oil slows down the ageing process of skin cells, it is often used in the treatment of complicated skin diseases
- erucic oil is rich in vitamin E, it is a natural antioxidant to prevent skin ageing, it regenerates and cares for dehydrated skin
- shea butter moisturises and acts perfectly against premature skin ageing (anti-ageing effect)
- pyroglutamic acid (PCA), occurring naturally in skin, maintains water in, moisturises, softens and smooths skin
- patented ingredient Olivem produces liquid crystals in emulsion, that have a dominating influence for easy absorption, ensuring adequate hydration and water resistance

ESSENS Colostrum Cellulite Cream

- argan oil slows down the ageing process of skin cells, it is often used in the treatment of complicated skin diseases
- shea butter moisturises and acts perfectly against premature skin ageing (anti-ageing effect)
- ivy extract and caffeine suppress the appearance of cellulite, improve the quality of the skin and eliminate inequalities
- patented ingredient Olivem produces liquid crystals in emulsion, that have a dominating influence for easy absorption, ensuring adequate hydration and water resistance

NATURAL COSMETICS!

aloe vera

LET'S SET OFF TOGETHER ON AN ADVENTURE, GOING BACK SEVERAL THOUSAND YEARS, WHEN THE ANCIENT EGYPTIANS ALREADY WIDELY USED THE HEALING POWERS OF ALOE VERA. ITS IMPORTANCE WAS SO STRONG THAT ITS IMAGES HAVE BEEN FOUND ON THE STONE WALLS IN VALLEY OF KINGS. IT POSSESSES EXTRAORDINARY AND BENEFICIAL EFFECTS WE APPRECIATE EVEN TODAY. THIS NATURAL WONDER IN ITS FINEST FORM IS GROWN FAR FROM THE ADVERSE INFLUENCE OF CIVILIZATION IN THE WIDE MEXICAN PLAINS FLOODED BY SUBTROPICAL SUN RAYS.

Aloe Vera Barbadosensis Miller

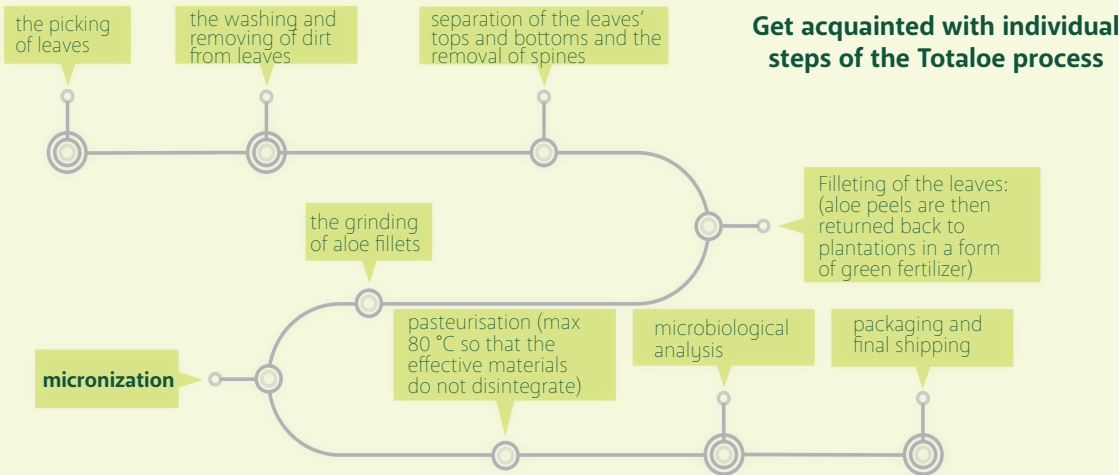

(**true aloe**) may grow up to 100cm tall and is a succulent perennial herb with a short stem and a rosette of sparsely growing, spiny leaves. Plant origin is mostly attributed to the Nile basin, but is now cultivated in climatically conforming regions around the world. The pulp of the leaves is formed by colourless cells with a gel-like content that has **clinically proven health benefits** and is therefore used as a food supplement and has now found its place in the cosmetics industry. Aloe Vera Gel contains amino acids, vitamins, minerals, enzymes, polysaccharides and many other beneficial substances. The values of these substances are not constant and vary, depending mainly on the growth conditions. On these grounds, ESSENS products are made exclusively from the Aloe Vera Barbadosensis Miller and grown in the **BIO quality** of the natural environment and non-contaminated areas of Jaumave, Mexico. The plants are watered only by rain or spring water from the mountains without the use of fertilizers, insecticides or herbicides. They are not genetically modified.

The growing, manufacturing process and the resulting material is documented by internationally recognized quality certificates:

The Totaloe process - this revolutionary way of processing aloe vera maintains preservation of 200 active materials and more than 75 different nutrients. It combines traditional manual processes with additional phases ensuring the perfect quality of processed gel.

Micronization - one of the ways to increase the biological availability of medicines, natural substances, vitamins and minerals. The raw material is micronized into particles only a few micrometers in diameter. This increases the surface area of the resulting material and enables faster absorption in the body, increasing the effectiveness of the food supplement.

ESSENS Aloe Vera Gel Drink contains an unrivalled 99.5 % of aloe vera. In combination with the TOTALOE process and MICRONIZATION, maximal possible active materials can be achieved, which makes it the best product on the market in this area!

price 500 ml

16,60 €

ESSENS Aloe Vera 99,5% Gel Drink - Vitamin C

ESSENS Aloe Vera 99,5% Gel Drink - Grape

food supplement manufactured from certified Aloe Vera Barbadensis Miller of the highest quality

- available in two flavours - with vitamin C and with grape concentrate
- does not contain aloin - a glycoside with strong laxative effects, found in the leaves of aloe vera
- supports the work of the digestive system, helps with regular bowel function, supports the movement of intestinal contents
- contributes to innate protection against microorganisms
- supports the immune system
- contributes actively against tiredness
- helps maintain a healthy blood sugar level, supports synthesis and secretion of insulin
- contributes to maintaining healthy skin
- has a beneficial effect on women's reproductive organs, making the course of the menstrual cycle easier, helps ease symptoms of menopause
- has a positive effect on the condition of skin, hair and nails
- without artificial colouring, sugar, gluten or lactose

ESSENS Aloe Vera Concentrate with herbal extracts, an undiluted concentrate of 10:1 guarantees maximal active ingredients from the aloe vera and maximum efficiency in the body.

ESSENS Aloe Vera Concentrate with herbal extracts

food supplement manufactured from the certified Aloe Vera Barbadensis Miller of the highest quality

- extracts of medicinal plants – dandelion, milk thistle, nettle
- does not contain aloin – a glycoside with strong laxative effects, found in the leaves of aloe vera
- supports the work of the digestive system, helps with regular bowel function, supports the movement of intestinal contents
- has a positive effect on the proper function of the liver and contributes to lower blood cholesterol
- supports the body's natural defences
- helps maintain a healthy heart, promotes venous circulation
- positively affects the nervous system's function
- has a positive effect on skin, hair and nails
- without artificial colouring, sugar, gluten or lactose

price 100 ml
